

Exporting to DOCX

When you're ready to review your structure offline or share it with collaborators, you can export your outline.

Scryla generates a clean **DOCX document** containing:

- Chapter titles
- Chapter overviews
- Scene descriptions

This makes it easy to send your story outline to editors or import it into drafting tools.

Simply click the **Export as .docx button** from the Outline view to download your complete outline.

Revision #1
